

Energy-saving system ESAR 1 M B111083

Product Information Sheet

Technical data	B111083
Version	Manual
Voltage	230 V
Frequency	50 Hz

Product Description

- Fact Sheet
- Shutting off the compressed air pipe reduces energy costs
 - Service life of the compressed air system extended due to slow opening of the ball valve
 - Capable of performing simple control tasks
 - Brass nickel-plated ball valve, hard-chrome plated ball with Teflon coating
 - 230 V control boxes (switching compressed air supply on and off)
 - With manual actuator and control lamp
